The Future of Nursing Institute of Medicine 2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Beyond Performance Scott Keller 2011-06-01 The secret of achieving and sustaining organizational excellencerevealed In an ever-changing world where only a third of excellentorganizations stay that way over the long term, and where evenfewer are able to implement successful change programs, leaders arein need of big ideas and new tools to thrive. In BeyondPerformance, McKinsey & Company's Scott Keller and ColinPrice give you everything you need to build an organization thatcan execute in the short run and has the vitality to prosperover the long term. Drawing on the most exhaustive research effort of its kind onorganizational effectiveness and change management, Keller andPrice put hard science behind their big idea: that the health of anorganization is equally as important as its performance. In thebook's foreword, management guru Gary Hamel refers to this notionas "a new manifesto for thinking about organizations." The authors illustrate why copying management best practicesfrom other companies is more dangerous than helpful Clearly explains how to determine the mutually reinforcingcombination of management practices that best fits yourorganization's context Provides practical tools to achieve superior levels ofperformance and health through a staged change process: aspire,assess, architect, act, and advance. Among these are new techniquesfor dealing with those aspects of human behavior that are seeminglyirrational (and therefore confound even the smartest leaders), yetentirely predictable Ultimately, building a healthy organization is an intangibleasset that competitors copy at their peril and that enables you toskillfully adapt to and shape your environment faster thanothers—giving you the ultimate competitive advantage.

Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Successful School Leadership Christopher Day 2017-12

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders

that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Strategy That Works Paul Leinwand 2016-01-12 How to close the gap between strategy and execution Two-thirds of executives say their organizations don't have the capabilities to support their strategy. In Strategy That Works, Paul Leinwand and Cesare Mainardi explain why. They identify conventional business practices that unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently leap ahead of their competitors. Based on new research, the authors reveal five practices for connecting strategy and execution used by highly successful enterprises such as IKEA, Natura, Danaher, Haier, and Lego. These companies: • Commit to what they do best instead of chasing multiple opportunities • Build their own unique winning capabilities instead of copying others • Put their culture to work instead of struggling to change it • Invest where it matters instead of going lean across the board • Shape the future instead of reacting to it Packed with tools you can use for building these five practices into your organization and supported by in-depth profiles of companies that are known for making their strategy work, this is your guide for reconnecting strategy to execution.

Dissertation Abstracts International 2008

China's Grand Strategy Andrew Scobell 2020-07-27 To explore what extended competition between the United States and China might entail out to 2050, the

authors of this report identified and characterized China's grand strategy, analyzed its component national strategies (diplomacy, economics, science and technology, and military affairs), and assessed how successful China might be at implementing these over the next three decades.

Resources in Education 1998

Preparing Students for College and Careers Katie Larsen McClarty 2017-08-22 Preparing Students for College and Careers addresses measurement and research issues related to college and career readiness. Educational reform efforts across the United States have increasingly taken aim at measuring and improving postsecondary readiness. These initiatives include developing new content standards, redesigning assessments and performance levels, legislating new developmental education policy for colleges and universities, and highlighting gaps between graduates' skills and employers' needs. In this comprehensive book, scholarship from leading experts on each of these topics is collected for assessment professionals and for education researchers interested in this new area of focus. Cross-disciplinary chapters cover the current state of research, best practices, leading interventions, and a variety of measurement concepts, including construct definitions, assessments, performance levels, score interpretations, and test uses.

Mindset Carol S. Dweck 2007-12-26 From the renowned psychologist who introduced the world to "growth mindset" comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, *GatesNotes* "It's not always the people who start out the smartest who end up the smartest." After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. *Mindset* reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

Make It Stick Peter C. Brown 2014-04-14 Discusses the best methods of learning, describing how rereading and rote repetition are counterproductive and how such techniques as self-testing, spaced retrieval, and finding additional layers of information in new material can enhance learning.

Cincinnati Magazine 2003-04 Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

Nine Things Successful People Do Differently Heidi Grant Halvorson 2017-10-17 Are you at the top of your game—or still trying to get there? Take your cues from the short, powerful *Nine Things Successful People Do Differently*, where the strategies and goals of the world's most successful people are on

display—backed by research that shows exactly what has the biggest impact on performance. Here's a hint: accomplished people reach their goals because of what they do, not just who they are. Readers have called this "a gem of a book." Get ready to accomplish your goals at last.

Minority Serving Institutions National Academies of Sciences, Engineering, and Medicine 2019-03-05 There are over 20 million young people of color in the United States whose representation in STEM education pathways and in the STEM workforce is still far below their numbers in the general population. Their participation could help re-establish the United States' preeminence in STEM innovation and productivity, while also increasing the number of well-educated STEM workers. There are nearly 700 minority-serving institutions (MSIs) that provide pathways to STEM educational success and workforce readiness for millions of students of color and do so in a mission-driven and intentional manner. They vary substantially in their origins, missions, student demographics, and levels of institutional selectivity. But in general, their service to the nation provides a gateway to higher education and the workforce, particularly for underrepresented students of color and those from low-income and first-generation to college backgrounds. The challenge for the nation is how to capitalize on the unique strengths and attributes of these institutions and to equip them with the resources, exceptional faculty talent, and vital infrastructure needed to educate and train an increasingly critical portion of current and future generations of scientists, engineers, and health professionals. Minority Serving Institutions examines the nation's MSIs and identifies promising programs and effective strategies that have the highest potential return on investment for the nation by increasing the quantity and quality MSI STEM graduates. This study also provides critical information and perspective about the importance of MSIs to other stakeholders in the nation's system of higher education and the organizations that support them.

Career Moves Athena Vongalis-Macrow 2014-02-05 Mentoring and career guidance are the missing ingredients in women's career planning at the higher education level. Career Moves recognizes and gives voice to some of the common career concerns of women in higher education and responds to these through well informed, researched and experiential chapters focussing on interests specific to women in academia. Career Moves draws on the substantial knowledge, experience and information of successful women currently working in higher education. Each chapter presents strategic information for academics working in higher education who may be seeking insider's advice about negotiating their careers. The authors, as 'mentors', reflect, discuss and offer critical learning to the readers. The aim is to help guide and shape women's career moves in higher education. In this international edition authors have given personal accounts of what works and how women could prepare for the next stages of their academic careers. Authors have given sociological accounts of obstacles and how these can impede women if they are not aware of strategies to overcome barriers. Insights about successful mentoring programs are highlighted to provide possible models for organizations. Career Moves is an international collection of book chapters that explore a range of specific issues that all women in higher education face or will face as they move up the career ladder.

The Long Game Rush Doshi 2021-06-11 For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In The Long Game, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

TALIS Creating Effective Teaching and Learning Environments First Results from TALIS OECD 2009-07-21 This publication is the first report from the

OECD's Teaching and Learning International Survey (TALIS). It provides quantitative, policy-relevant information on the teaching and learning environment in schools in 23 countries.

PISA Knowledge and Skills for Life OECD 2001-12-06 Knowledge and Skills for Life presents evidence on student performance in reading, mathematical and scientific literacy, reveals factors that influence the development of these skills at home and at school, and examines what the implications are for policy development.

Mother Jones Magazine 1992-03 Mother Jones is an award-winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues.

Learning and Reconciliation Through Indigenous Education in Oceania Pangelinan, Perry Jason Camacho 2021-12-10 The mission of higher education in the 21st century must address the reconciliation of student learning and experiences through the lens of indigenous education and frameworks. Higher learning institutions throughout the oceanic countries have established frameworks for addressing indigeneity through the infusion of an indigenous perspectives curriculum. The incorporation of island indigenous frameworks into their respective curriculums, colleges, and universities in the oceanic countries has seen positive impact results on student learning, leading to the creation of authentic experiences in higher education landscapes. Learning and Reconciliation Through Indigenous Education in Oceania discusses ways of promoting active student learning and unique experiences through indigenous scholarship and studies among contemporary college students. It seeks to provide an understanding of the essential link between practices for incorporating island indigenous curriculum, strategies for effective student learning, and course designs which are aligned with frameworks that address indigeneity, and that place college teachers in the role of leaders for lifelong learning through indigenous scholarship and studies in Oceania. It is ideal for professors, practitioners, researchers,

scholars, academicians, students, administrators, curriculum developers, and classroom designers.

Atomic Habits James Clear 2018-10-16 The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes, Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: make time for new habits (even when life gets crazy); overcome a lack of motivation and willpower; design your environment to make success easier; get back on track when you fall off course; ...and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

Ten Steps to a Results-based Monitoring and Evaluation System Jody Zall Kusek 2004-06-15 An effective state is essential to achieving socio-economic and sustainable development. With the advent of globalization, there are growing pressures on governments and organizations around the world to be more responsive to the demands of internal and external stakeholders for good governance, accountability and transparency, greater development effectiveness, and delivery of tangible results. Governments, parliaments, citizens, the private sector, NGOs, civil society, international organizations and donors are among the stakeholders interested in better performance. As demands for greater accountability and real results have increased, there is an attendant need for enhanced results-based monitoring and evaluation of policies, programs, and projects. This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system. These steps begin with a OC Readiness Assessment OCO and take the practitioner through the design, management, and importantly, the sustainability of such systems. The Handbook describes each step in detail, the tasks needed to complete each one, and the tools available to help along the way."

The Official ACT Mathematics Guide ACT 2021-06-22 The ACT official subject guides are a step by step guide for outlining the preparation for the ACT section tests. These prep guides provide students a concept-based outline for the subjects they plan to focus on. Each one of the official guides, is an efficient prep tool comprised of the most current and relevant test information packed into one guide. In addition to the book, the entire pool of questions are available online for a customizable learning experience. The ACT official subject guides are the best resource to get detailed input and practice to help you in preparation for the ACT. By using this guide, students can feel comfortable and confident that they are preparing to do their best! Features of the ACT® Official Math Guide Includes: Review of the entire mathematics test so you'll know what to expect; Familiarize yourself with the types of math questions for on the ACT; Understand the math topics within the problems you'll solve while taking the mathematics test; detailed explanations for every official ACT Math question in the book The only books with real ACT Math questions organized by question type; includes detailed explanations for each questions; understand math problems within the problems you'll solve while taking the mathematics test.

Inclusion Strategies That Work for Adolescent Learners! Toby J. Karten 2009-03-17 This reader-friendly guide describes adolescent development and provides strategies for creating an inclusive secondary classroom, including differentiation, brain-based learning, universal design, and more.

House of Commons - Transport Committee: Local Authority Parking Enforcement - HC 118 Great Britain: Parliament: House of Commons: Transport Committee 2013-10-23 The use of parking charges and fines specifically to raise revenue by local authorities is neither acceptable nor legal. Annual parking accounts would allow the public to see how much local revenue is derived from the enforcement of fines, and what proportion of this come from on or off street

parking charges. It's right that parking charges be determined locally, but hard to justify fines that substantially exceed penalties for more serious offences like speeding. DfT's statutory guidance should stipulate that local authorities implement a 'grace period' of 5 minutes after the expiry of paid-for time on any paid parking before enforcement officers issue a Penalty Charge Notice (PCN). The Guidance should be clarified and updated, particularly in relation to rules for loading and unloading. A 25% penalty charge discount should also be introduced for motorists who pay within 7 days of losing any appeal to a parking tribunal. Local authorities currently offer a 50% discount if motorists pay their penalty charge within 14 days, but this is not available to motorists who appeal to a tribunal. Motorists should also not have to appeal against PCNs where tribunal adjudicators have repeatedly identified a problem such as poor signage. Adjudicators should also be given powers to allow appeals where local authorities fail to follow statutory guidance concerning the use cameras. While businesses cannot be completely exempt from parking restrictions, local authorities must also ensure that the need to restrict parking and manage congestion does not stifle the ability of businesses to trade and help grow the economy

Prevent strategy Great Britain: Home Office 2011-06-07 The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed
