Textual Translation and Live Translation Fernando Poyatos 2008 After the many interdisciplinary perspectives on nonverbal communication offered by the author in his previous seven John Benjamins books, which have generated a wide range of scholarly applications, the present monograph is dominated by a very broad concept of translation. This treatment of translation includes theater and cinema (enriching our intellectual-sensorial experience of both 'reading act' and 'viewing act') and offers among other topics: sensorial-intellectual-emotional pre- and post-reading interactions with books; mute or audible 'oralization' of texts; the translator's linguistic and nonverbal-cultural fluency and implicit textual paralinguistic and kinesics; translating functions of pictorial illustrations; the blind's text and film perception; the foreign reader's cultural background and circumstances; theater and cinema spectators' total sensory-intellectual experience of plays and films beyond staging or projection; the multiple interrelationships between cinema and theater performers, spectators and their environments, of special interest to all those involved in the theater; and the translator's challenging textual perception of sounds and movements. Over 800 literary quotations, and two virtually exhaustive English inventories of sound- and movement-denoting words with many examples, offer serious students of translation, language or literature a rich reference and drill source.

The Film Paintings of David Lynch Allister Mactaggart 2014-05-14 One of the most distinguished filmmakers working today, David Lynch is a director whose vision of cinema is firmly rooted in fine art. He was motivated to make his first film as a student because he wanted a painting that "would really be able to move." Most existing studies of Lynch, however, fail to engage fully with the complexities of his films' relationship to other art forms. The Film Paintings of David Lynch fills this void, arguing that Lynch's cinematic output needs to be considered within a broad range of cultural references. Aiming at both Lynch fans and film studies specialists, Allister Mactaggart addresses Lynch's films from the perspective of the relationship between commercial film, avant-garde art, and cultural theory. Individual Lynch films—The Elephant Man, Blue Velvet, Twin Peaks, Lost Highway, The Straight Story, Mulholland Drive, Inland Empire—are discussed in relation to other films and directors, illustrating that the solitary, or seemingly isolated, experience of film is itself socially, culturally, and politically important. The Film Paintings of David Lynch offers a unique perspective on an influential director, weaving together a range of theoretical approaches to Lynch's films to make exciting new connections among film theory, art history, psychoanalysis, and cinema.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare

had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Paths of Innovation David C. Mowery 1999-10-28 In 1903 the Wright brothers' airplane travelled a couple of hundred yards. Today fleets of streamlined jets transport millions of people each day to cities worldwide. Between discovery and application, between invention and widespread use, there is a world of innovation, of tinkering, improvement and adaptation. This is the world David Mowery and Nathan Rosenberg map out in *Paths of Innovation*, a tour of the intersecting routes of technological change. Throughout their book, Mowery and Rosenberg demonstrate that the simultaneous emergence of new engineering and applied science disciplines in the universities, in tandem with growth in the Research and Development industry and scientific research, has been a primary factor in the rapid rate of technological change. Innovation and incentives to develop new, viable processes have led to the creation of new economic resources - which will determine the future of technological innovation and economic growth.

Montessori, Dewey, and Capitalism Jerry Kirkpatrick 2008 Synthesizing ideas from such disparate thinkers as educator Maria Montessori, philosophers John Dewey and Ayn Rand, and Austrian economist Ludwig von Mises, *Montessori, Dewey, and Capitalism* presents a philosophy of education—the theory of concentrated attention and independent judgment—that requires laissez-faire capitalism for its full realization. It is not an argument, except indirectly, for the separation of education and state nor is it a critique of present and past state-run schooling. It is an argument for the abolition of coercion in all areas of life. What is the ideal education system? asks the author. One that rejects the premise of obedience to authority. Not just in teaching, but also in parenting and in all social relations. Just as an ideal social system would allow citizens to pursue their values without interruption or control from an outside authority, namely the state, so also the ideal education system should allow children and students to concentrate without interruption on the learning tasks that interest them. The adult guides and nurtures the young, neither coercing nor neglecting them, to develop the confidence and independence required for an adult life in a capitalist society.
