Dutton's Dirty Diggers Catherine S. Fowler 2020 "The book traces the beginnings, development, and demise of a unique program of mobile camps for Senior Girl Scouts in the American Southwest between the years 1947 and 1957. In addition to a history of the program, it features trip itineraries and selected memories from the nearly 300 girls who went through the program of two week caravan camps, each covering roughly 1200 miles of the northern Southwest. Girl Scouts visited National Parks and Monuments, and many other points of scientific and scenic interest, and often they returned for several seasons to see and learn yet more. The camps were led by Dr. Bertha Dutton, curator at the Museum of New Mexico and Associate in Archaeology at the School of American Research (now the School for Advanced Research), Santa Fe. They were jointly sponsored by Girl Scouts of the United States of America and the Museum and the School. Dutton was well versed in the Indigenous, Hispanic, and American heritages in the Southwest, as well as in the region's scenic and natural wonders. While on the road, Dutton and other experts in the fields of anthropology, archaeology, geology, natural history, history, and more, helped the campers appreciate what they were seeing and learning. At the request of the campers, and to further their experiences, Dutton also held two week excavation camps for six seasons at an archaeological site (Pueblo Largo) in the Galisteo Basin south of Santa Fe"

The Body Project Eric Stice 2007-04-12 Ours is a society in which thinness, particularly in women, is idealized, even at the cost of health. Adolescent girls and young women are especially at risk of developing eating disorders such as anorexia nervosa, bulimia nervosa, and binge eating disorder. The need for wide-spread prevention among at-risk populations is paramount, as these disorders are often difficult to treat and can contribute to a range of physical and mental health problems. Studies have found that a cognitive dissonance-based intervention significantly outperforms other intervention programs and is successful in preventing onset of eating disorders. This facilitator guide outlines a two part group intervention program for adolescent and college-aged girls at risk of developing eating disorders. In the first part of the program, participants critique the thin-ideal through discussion, role-playing, and written exercises. Participants learn skills that increase body satisfaction, decrease unhealthy weight control behaviors, and prevent eating disorder symptoms. The second part of the intervention is designed to help participants make gradual and permanent lifestyle changes to achieve a healthy body weight. It teaches how to eat for energy balance, make healthy food choices, and incorporate physical exercise into a daily routine. This group therapy program is based on 16 years of research and has been completed by over 1000 adolescent girls and young women. It can be effectively delivered by real world providers, such as school counselors, nurses, and teachers. This facilitator guide provides all the information needed to successfully implement the program, including explanation of Cognitive Dissonance theory, session outlines complete with exercises, and recommendations on how to train group leaders and recruit participants.

A Closer Look at Women's Health Lakisha Roberts 2021-11-16 "This book includes six chapters that detail various aspects of women's health. Chapter One uses a hermeneutic phenomenological method to explore hope in eating disordered women. Chapter Two considers the importance of hope as a mediating factor in the complicated relationships between body shame and eating disorder behavior as well as with substance use/abuse behavior via an Internet survey. Chapter Three examines the influence of six Indigenous Australian sportswomen and their role as sporting role models for women and girls. Chapter Four highlights the research that has been conducted regarding eating disorders in women of color and reviews the unique race and culture-related risk factors that may influence the presence of eating disorder symptoms. Chapter Five deals with the history and definition of food craving, the cognitive event of appetizing targeting, the associations with the diet mentality as a promoter of moral judgment concerning food, and the twelve primary triggers according to the latest data from studies in the field of eating disorders. The Ambassadors Henry James 2021-03 Nothing is more easy than to state the subject of "The Ambassadors," which first appeared in twelve numbers of The North American Review (1903) and was published as a whole the same year. The situation involved is gathered up betimes, that is in the second chapter of Book Fifth, for the reader's benefit, into as few words as possible—planted or "sunk," stiffly and saliently, in the centre of the current, almost perhaps to the obstruction of traffic. Never can a composition of this sort have sprung straighter from a dropped grain of suggestion, and never can that grain, developed, overgrown and smothered, have yet lurked more in the mass as an independent particle. The whole case, in fine, is in Lambert Strether's irrepressible outbreak to little Bilham on the Sunday afternoon in Gloriani's garden, the candour with which he yields, for his young friend's enlightenment, to the charming admonition of that crisis. The idea of the tale resides indeed in the very fact that an hour of such unprecedented ease should have been felt by him as a crisis, and he is at pains to express it for us as neatly as we could desire. The remarks to which he thus gives utterance contain the essence of "The Ambassadors," his fingers close, before he has done, round the stem of the full-blown flower; which, after that fashion, he continues officiously to present to us. "Live all you can; it's a mistake not to. It doesn't so much matter what you do in particular so long as you have your life. If you haven't had that what have you had? I'm too old—too old at any rate for what I see. What one loses one loses; make no mistake about that. Still, we have the illusion of freedom; therefore don't, like me to-day, be without the memory of that illusion. I was either, at the right time, too stupid or too intelligent to have it, and now I'm a case of reaction against the mistake. Do what you like so long as you don't make it. For it was a mistake. Live, live!" Such is the gist of Strether's appeal to the impressed youth, whom he likes and whom he desires to befriend; the word "mistake" occurs several times, it will be seen, in the course of his remarks—which gives the measure of the signal warning he feels attached to his case. He has accordingly missed too much, though perhaps after all constitutionally qualified for a better part, and he wakes up to it in conditions that press the spring of a terrible question. Would there yet perhaps be time for reparation?—reparation, that is, for the injury done his character; for the affront, he is quite ready to say, so stupidly put upon it and in which he has even himself had so clumsy a hand? The answer to which is that he now at all events sees; so that the business of my tale and the march of my action, not to say the precious moral of everything, is just my demonstration of this process of vision.

Becoming: Adapted for Young Readers Michelle Obama 2021-03-02 #1 NEW YORK TIMES BESTSELLER • Michelle Obama's worldwide bestselling memoir, *Becoming*, is now adapted for young readers. Michelle Robinson was born on the South Side of Chicago. From her modest beginnings, she would become Michelle Obama, the inspiring and powerful First Lady of the United States, when her husband, Barack Obama, was elected the forty-fourth president. They would be the first Black First Family in the White House and serve the country for two terms. Growing up, Michelle and her older brother, Craig, shared a bedroom in their family's upstairs apartment in her great-aunt's house. Her parents, Fraser and Marian, poured their love and energy into their children. Michelle's beloved dad taught his kids to work hard, keep their word, and remember to laugh. Her mom showed them how to think for themselves, use their voice, and be unafraid. But life soon took her far from home. With determination, carefully made plans, and the desire to achieve, Michelle was eager to expand the sphere of her life from her schooling in Chicago. She went to Princeton University, where she learned what it felt like to be the only Black woman in the room. She then went to Harvard Law School, and after graduating returned to Chicago and became a high-powered lawyer. Her plans changed, however, when she met and fell in love with Barack Obama. From her early years of marriage, and the struggle to balance being a working woman, a wife, and the mom of two daughters, Michelle Obama details the shift she made to political life and what her family endured as a result of her husband's fast-moving political career and campaign for the presidency. She shares the glamour of ball gowns and world travel, and the difficulties of comforting families after tragedies. She managed to be there for her daughters' swim competitions and attend plays at their schools without catching the spotlight, while defining and championing numerous initiatives, especially those geared toward kids, during her time as First Lady. Most important, this volume for young people is an honest and fascinating account of Michelle Obama's life led by example. She shares her views on how all young people can help themselves as well as help others, no matter their status in life. She asks readers to realize that no one is perfect, and that the process of becoming is what matters, as finding yourself is ever evolving. In telling her story with boldness, she asks young readers: Who are you, and what do you want to become?
