Webthe schematics are prepared on the metal layer with a conventional surface micromachining process. Applying heat to the device induces thermal stress at the interface between the underlying substrate and device layer. The thermal stress leads to crack propagation at the interface. After a thermal cycle consisting of heating and cooling, the

## BMP180 Digital pressure sensor - Adafruit Industries

Web3.2 General function and application schematics The BMP180 consists of a piezo-resistive sensor, an analog to digital converter and a control unit with E 2PROM and a serial I C interface.
