Reasoning With Democratic Values 2.0, Volume 2 David E. Harris 2018-05 The extensively updated edition presents an engaging approach to teaching U.S. history that promotes critical thinking and social responsibility. In Volume 2, students investigate 19 significant historical episodes beginning with the era of expansion and reform and ending with problems facing Americans in the contemporary era. A comprehensive Instructor's Manual is also available for purchase. In Volume 2, students can grapple with such ethical dilemmas as: Should Susan B. Anthony and Elizabeth Cady Stanton have supported the adoption of the Fifteenth Amendment to the U.S. Constitution? Was investigative journalist Nellie Bly justified in lying to gain access to the Women's Lunatic Asylum? Was Woodrow Wilson right to call for entry of the United States into World War I? Should interned Japanese Americans have volunteered to serve in the United States Army during World War II? Should Hollywood director Elia Kazan have named communists in his testimony before the House Un-American Activities Committee? Should Representative John Conyers have introduced legislation for reparations to African Americans? "A powerful approach to learning history. The lively and exciting true stories provide ample background to engage students in discussions of well-framed questions that are perennial and important." —Diana Hess, dean, University of Wisconsin–Madison "Ethical reasoning is joined with historical reasoning—values with inquiry—in an array of well selected cases. This curriculum belongs in every U.S. history classroom." —Walter C. Parker, University of Washington "Clearly organized and eminently balanced, these volumes will help students become citizens who can converse across their differences." —Jonathan Zimmerman, University of Pennsylvania "These volumes will help build a deeper understanding of significant historical concepts and present wonderful opportunities to engage in critical thinking." —Amy Bloom, J.D., social studies education consultant, Oakland Schools

An Introduction to Human-Environment Geography William G. Moseley 2013-08-05 This introductory level text explores various theoretical approaches to human-environment geography, demonstrating how local dynamics and global processes influence how we interact with our environments. Introduces students to fundamental concepts in environmental geography and science Explores the core theoretical traditions within the field, along with major thematic issues such as population, food and agriculture, and water resources Offers an engaging and unique view of the spatial relationships between humans and their environment across geographical locations around the world Includes a variety of real-world policy questions and emphasizes geography's strong tradition of field work by featuring prominent nature-society geographers in guest fieldnotes

Soil Pollution Ibrahim Mirsal 2013-04-17 This graduate-level text and reference work is unique among the soil literature. It deals with the interdisciplinary

fields of soil pollution and remediation. It starts off with a thorough and comprehensible introduction to the relevant fundamentals of mineralogy, chemistry, and soil properties. Readers are thus well prepared to understand the biochemical aspects of soil remediation then presented. The book's holistic approach and narrative style are complemented by numerous and detailed illustrations. Soil pollution is an asset not only to graduate students and instructors, but also to professionals from the environmental and agricultural sciences, as it provides an integrated overview of previously separately treated material.

Contemporary Human Geography James M. Rubenstein 2013 "Contemporary Human Geography" is a beautifully crafted, modular springboard into essential human and cultural geography concepts, designed for the contemporary geography student. This brief, innovative text explores current human geography in the bold visual style that distinguishes Dorling Kindersley (DK) publications. Topics within each chapter are organized into modular, self-contained, two-page spreads. Together with the graphics, Rubenstein's efficient writing engages students, presenting information clearly without sacrificing the high-quality geography content essential to students and instructors.

Ecoregions Robert G. Bailey 2014-04-03 Global warming and human-driven impacts are changing the World's ecological zones. This book applies the principles described in Bailey's *Ecosystem Geography: From Ecoregions to Sites*, 2nd ed. (Springer 2009, 1st ed. 1996) to describe and characterize the major terrestrial and aquatic ecological zones of the Earth. Bailey's system for classifying these zones has been adopted by major organizations such as the U.S. Forest Service and The Nature Conservancy and this book is a significant contribution to a long tradition of classifying and studying the world's ecological regions or ecoregions. It includes two color maps that show the major ecoregions of the continents and oceans. Also included are: - 106 illustrations with 55 in full color - A new chapter on mountains is included. - There are new sections that address concerns about how eco regions are changing under the relentless influence of humans and climate change - Another new feature is the discussion of using eco regional patterns to transfer research results and select sites for detecting climate change effects on ecosystem distribution - Use of ecoregional patterns to design monitoring networks and sustainable landscapes - Fire regimes in different regional ecosystems and their management implications.

Atmosphere, Weather and Climate Roger Graham Barry 1971

Global Environmental Change Antoinette Mannion 2014-09-19 Now in its second edition. This text has been extensively revised and rewritten to reflect the growth in environmental research during the last decade. Human-induced environmental change is occurring at such a rapid rate that, inevitably, the fundamental processes involved in biogeochemical cycling are being altered. *Global Environmental Change* considers alterations to the biogeochemical cycles of carbon, nitrogen, sulphur and other elements as a result of industrial/technological development and agriculture, which have significantly altered the natural environment. The book adopts a temporal and spatial approach to environmental change, beginning with the natural environmental change of the Quaternary period and continuing with the culturally-induced change since the inception of agriculture 10,000 years ago.

Elemental Geosystems Robert W. Christopherson 1999-08-01 This book offers a treatment of the elements of physical geography without sacrificing scientific content. The book is written, organized, and illustrated to give an accessible, systematic, and visually appealing start in physical geography. It presents the most up-to-date information about Earth's physical systems available in an introductory book all viewed through the spatial analysis approach unique to physical geography. The book is supported by a superior cartographic and illustration program.

Natural Environmental Change Antoinette Mannion 2002-02-07 *Natural Environmental Change* offers a concise introduction to this key topic in the study of the environment, geography, and earth science. Illustrated throughout, each chapter provides a broad spectrum of international case studies and further reading guides. Introductory chapters examine the theories of environmental change and provide a summary of Earth history. The records of environmental change are then explained, as revealed by data from various archives such as ocean sediment, ice core, terrestrial deposits such as glacial moraines and lake sediments, tree rings, and historical and meteorological records. Final chapters detail the changes that have occurred in high, middle and low latitudes, and the book concludes with a critical assessment of the strengths and weaknesses of current understanding. An extensive bibliography will also prove invaluable to those studying in this area.

Wetland Habitats of North America Darold P. Batzer 2012-05-22 "Wetland Habitats of North America is essential reading for everyone who studies, manages, or visits North American wetlands. It fills an important void in the wetland literature, providing accessible and succinct descriptions of all of the continent's major wetland types." Arnold van der Valk, Iowa State University "Batzer and Baldwin have compiled the most comprehensive compendium of North American wetland habitats and their ecology that is presently available—a must for wetland scientists and managers." Irving A. Mendelssohn, Louisiana State University "If you want to gain a broad understanding of the ecology of North America's diverse wetlands, Wetland Habitats of North America is the book for you. Darold Batzer and Andrew Baldwin have assembled an impressive group of regional wetland scientists who have produced a virtual encyclopedia to the continent's wetlands. Reading the book is like a road trip across the Americas with guided tours of major wetland types by local experts. Your first stop will be to coastal wetlands with eight chapters covering tidal wetlands along the Atlantic, Gulf, and Pacific coasts. Then you'll travel inland where you can visit any or all of 18 types ranging from bottomland swamps of the Southeast to pothole marshes of the Northern Prairies to montane wetlands of the Rockies to tropical swamps of Central America and desert springs wetlands. All in one book—I'm impressed! Every wetlander should add this book to her or his swampland library. Ralph Tiner, University of Massachusetts—Amherst

The World of Sicilian Wine Bill Nesto 2013-03-26 The World of Sicilian Wine provides wine lovers with a comprehensive understanding of Sicilian wine, from its ancient roots to its modern evolution. Offering a guide and map to exploring Sicily, Bill Nesto, an expert in Italian wine, and Frances Di Savino, a student of Italian culture, deliver a substantive appreciation of a vibrant wine region that is one of Europe's most historic areas and a place where many cultures intersect. From the earliest Greek and Phoenician settlers who colonized the island in the eighth century B.C., the culture of wine has flourished in Sicily. A parade of foreign rulers was similarly drawn to Sicily's fertile land, sun-filled climate, and strategic position in the Mediterranean. The modern Sicilian quality wine industry was reborn in the 1980s and 1990s with the arrival of wines made with established international varieties and state-of-the-art enology. Sicily is only now rediscovering the quality of its indigenous grape varieties, such as Nero d'Avola, Nerello Mascalese, Frappato, Grillo, and distinctive terroirs such as the slopes of Mount Etna.

The Contemporary Caribbean Robert B. Potter 2015-07-17 This text focuses on the contemporary economic, social, geographical, environmental and political realities of the Caribbean region. Historical aspects of the Caribbean, such as slavery, the plantation system and plantocracy are explored in order to explain the contemporary nature of, and challenges faced by, the Caribbean. The book is divided into three parts, dealing respectively with: the foundations of the Caribbean, rural and urban bases of the contemporary Caribbean, and global restructuring and the Caribbean: industry, tourism and politics.

Connections Paul A. Gore 2015-12-14 Are you looking for a college success resource that speaks to the all aspects of a student's college experience? Connections is an innovative new text that offers the ideal balance of motivation, academics, and life skills. It starts with comprehensive coverage of the topics typically covered in the introductory course but has a unique emphasis on goal-setting, life skills and career planning. In every chapter, students are encouraged to take a positive, success-oriented approach to this course – and to life in general – by working to strengthen their strengths, celebrate progress, and use setbacks as opportunities for growth. With an emphasis on self-knowledge, and on building skills for college and career success, Connections empowers students to become self-regulated, collaborative learners – learners who thrive in school, on the job, and in the community.
