Enterprise 2.0 Andrew McAfee 2009-12-01 "Web 2.0" is the portion of the Internet that's interactively produced by many people; it includes Wikipedia, Facebook, Twitter, Delicious, and prediction markets. In just a few years, Web 2.0 communities have demonstrated astonishing levels of innovation, knowledge accumulation, collaboration, and collective intelligence. Now, leading organizations are bringing the Web's novel tools and philosophies inside, creating Enterprise 2.0. In this book, Andrew McAfee shows how they're doing this, and why it's benefiting them. Enterprise 2.0 makes clear that the new technologies are good for much more than just socializing-when properly applied, they help businesses solve pressing problems, capture dispersed and fast-changing knowledge, highlight and leverage expertise, generate and refine ideas, and harness the wisdom of crowds. Most organizations, however, don't find it easy or natural to use these new tools initially. And executives see many possible pitfalls associated with them. Enterprise 2.0 explores these concerns, and shows how business leaders can overcome them. McAfee brings together case studies and examples with key concepts from economics, sociology, computer science, consumer psychology, and management studies and presents them all in a clear, accessible, and entertaining style. Enterprise 2.0 is a must-have resource for all C-suite executives seeking to make technology decisions that are simultaneously powerful, popular, and pragmatic.

New Media and International Development Anke Schwittay 2014-09-19 New Media and International Development is the first in-depth examination of microfinance's enduring popularity with Northern publics. Through a case study of Kiva.org, the world's first person-to-person microlending website, and other microfinance organizations, the book argues that international development efforts have an affective dimension. This is fostered through narrative and visual representations, through the performance of development rituals and through bonds of fellowship between Northern donors and Southern recipients. These practices constitute people in the global North as everyday humanitarians and mobilize their affective investments, which are financial, social and emotional investments in distant others to alleviate their poverty. This book draws on ethnographic material from the US, India and Indonesia and the anthropological and development studies literature on humanitarianism, affect and the public faces of development. It opens up novel avenues of research into the formation of new development subjects in the global North. This book will appeal to researchers and students of international development, anthropology, media studies and related fields, as well as practitioners and professionals in the field of international development

The Maple® O.D.E. Lab Book Darren Redfern 2012-12-06 The Maple ODE Lab Book is intended to provide a thorough introduction to using symbolic computation software to model, solve, explore, and visualize ordinary differential equations. It is best used as a supplement to existing texts (see the bibliography for some of our recommended texts). Maple was chosen as our software package because of its ease-of-use, affordability, and popularity at many universities and colleges around the world. The version being used is Maple V Release 4. If you have a previous release of Maple, some of the commands shown in this lab book will work differently (or not at all), but the basic groundwork for solving ODEs hasn't changed. Speak to your system administrator about upgrading to Release 4, or contact: Waterloo Maple Inc. 450 Phillip Street Waterloo, Ontario CANADA N2L 5J2 Phone: (519) 747-2373 FAX: (519) 747-5284 E-mail: [info@maplesoft.com](mailto:info@maplesoft.com) WWW: <http://www.maplesoft.com> 1 2 • Chapter 1.

Introduction How This Lab Book Is Organized Each subsequent chapter of this lab book contains information and ex

amples of how to apply Maple to various elements of ordinary differential equations. It is suggested that you read the chapters with your computer on and Maple V Release 4 running. You can then execute many of the commands yourself and experiment by changing various parameters and/or initial conditions, observing the corresponding changes in the results.

NetOps 2.0 Transformation Ray Belleville 2021-02-13 "HOW TO DOUBLE YOUR NETOPS PRODUCTIVITY" WITHOUT WASTING TIME AND MONEY JUST BUYING TOOLS Introducing NetOps 2.0 Transformation - The DIRE Methodology NetOps 2.0 Transformation is a deep dive into why NetOps 1.0 does not scale in 2021 and how to transform painlessly into the DevOps/NetOps 2.0 era. ... No more dealing with unhappy customers, who want discounts and assurances. ... No more wasting time finding a solution that doesn't widely exist today. ... No more answering to the boss when things go wrong, even when it's not the network's fault. In under 150 pages, the author will outline the challenges associated with network operations organizations, why we're hitting the limits of NetOps 1.0, and provide a 4-step formula for transforming to NetOps 2.0. NetOps 2.0 Transformation - The DIRE Methodology has been in development for 27 years and adopted by professionals at Fortune 500 companies. The author of NetOps 2.0 Transformation was in the same position as you. He was transforming a NetOps organization but didn't know how to do it in a way that got results. Since the tech bubble burst in 2000, operations have been running on shoestring budgets. Ray realized that if he wanted to transform to NetOps 2.0 (without paying ridiculous sums of money to a consultant), he'd need to learn everything there is to know about network operations. So, that's what he did. He already had many years of experience to build on, so he read blogs, listened to tons of podcasts, and spend hours on the Internet, learning every secret he could from the best in the business. He spoke with 100s of different colleagues worldwide about their specific challenges and how they solved them. If You Can Read This Book, You Can Transform Your NetOps Organization NetOps 2.0 Transformation is super easy-to-use. ... even if you're new to IT Leadership. ... even if you work on the network, but not as a Manager or Director. ... even if you've only just begun your networking career. You can read this book in under 4 hours The FASTEST Way to Reduce MTTR Most people limit themselves by believing that good results take a long time. While it can work that way, it doesn't have to. Not when you apply the DIRE Methodology to your NetOps 2.0 Transformation, backed by years of experience. Think about it. By adopting the DIRE Method and supporting your organization with network automation, you could achieve an immediate reduction in MTTR. Not in a year. Not in 2 years. In just a few short

months, with the help of NetOps 2.0 Transformation -- The DIRE Methodology. Imagine What It Would Be Like To...

- Automate all the repetitive, time-consuming, and high-risk problems rather than chasing fires all day long.
- Mitigate the risk of unplanned outages by ensuring Network Hygiene is on autopilot.
- Enable your service desk to buffer operations through self-service assistance.
- Enable your application teams to deploy new revenue-generating services without unnecessary delay.
- Free up your top-level network engineers to work on our backlog of projects.

You can have all of these things with NetOps Transformations. How Do We Know NetOps Transformations Works? Ray Belleville is not just the author of NetOps 2.0 Transformations; he also used it to transform 100s of companies over the last 20+ years. Since he started using the DIRE Methodology, the results have been phenomenal:

- Escalation rates are down
- MTTR is lower, and availability is up
- Total cost of ownership is down
- Employee satisfaction is up

Why are you going to love NetOps 2.0 Transformations? It will:

- Save you hours researching how to perform a transformation
- Put an end to SLA payments caused by human error
- Create an efficient and effective operations team that will scale for NetOps 2.0
- Lower Mean Time to Repair (MTTR) by eliminating tedious, time-consuming tasks
- Be more agile in support of new revenue-generating products and services

You don't want to continue... ... explaining to your boss why a maintenance window took down half the network ... justifying another enterprise tool, just to see it used for 5% of its value ... worrying about how to meet the CEO's automation initiatives ... wondering how you'll manage your KPIs and OKRs to get a full bonus ... feeling disappointed every time you look at your MTTR results and SLA payments ... settling for less success that you're capable of

By spending a few hours reading NetOps Transformation - The DIRE Methodology, you can experience the difference between NetOps 1.0 and NetOps 2.0 yourself.

Giving 2.0 Laura Arrillaga-Andreessen 2011-09-23 Gold Medal Winner; Philanthropy, Charities, and Nonprofits; 2012 Axiom Business Book Awards Giving 2.0 is the ultimate resource for anyone navigating the seemingly infinite

ways one can give. The future of philanthropy is far more than just writing a check, and Giving 2.0 shows how individuals of every age and income level can harness the power of technology, collaboration, innovation, advocacy, and social entrepreneurship to take their giving to the next level and beyond. Major gifts may dominate headlines, but the majority of giving still comes from individual households—ordinary people with extraordinary generosity. Even in 2009, at a time of deep recession, individual giving averaged almost \$2,000 per household and drove 82% of the \$300 billion donated that same year. Based on her vast experience as a philanthropist, academic, volunteer, and social innovator, Arrillaga-Andreessen shares the most effective techniques she herself pilots and studies and a vast portfolio of lessons learned during her lifetime of giving. Featuring dozens of stories on innovative and powerful methods of how individuals give time, money, and expertise—whether volunteering and fundraising, leveraging technology and social media, starting a giving circle, fund, foundation, or advocacy group, or aspiring to create greater social impact—Giving 2.0 shows readers how they can renew, improve, and expand their giving and reach their fullest potential. A practical, entertaining, and inspiring call to action, Giving 2.0 is an indispensable tool for anyone passionate about creating change in our world.

100 Years of Fundamental Theoretical Physics in the Palm of Your Hand E. B. Manoukian 2020-10-20 This book aims to integrate, in a pedagogical and technical manner, with detailed derivations, all essential principles of fundamental theoretical physics as developed over the past 100 years. It covers: Quantum physics and Stability Problems in the Quantum World, Minkowski Spacetime Physics Particle Classifications and Underlying Symmetries, Symmetry Violations, Quantum Field Theory of Particle Interactions, Higgs Field Physics, Supersymmetry: A Theory with Mathematical Beauty Superstrings, Gravity and Supergravity, General Relativity Predictions, including Frame Dragging, Intricacies of Black Hole Physics, Perturbative and Non-perturbative Quantum Gravity Intricacies of Modern Cosmology, including Inflation and Power Spectrum If you are in the process of learning, or are lecturing on, any of the subjects above, then this is your book - irrespective of your specialty. With over-specialization and no time to master all the fields given above, students, and perhaps many physicists, may find it difficult to keep up with all the exciting developments going on, and are even less familiar with their underlying technicalities: e.g. they might

have heard that the Universe is 13.8 billion years old, but have no idea on how this number is actually computed. This unique book will be of great value to graduate students, instructors and researchers interested in the intricacies and derivations of the many aspects of modern fundamental theoretical physics. And, although a graduate level book, some chapters may also be suitable for advanced undergraduates in their final year.

Political Change and Public Culture in Post-1990 Nepal Michael J. Hutt 2016 This book explores various domains of the Nepali public sphere in which ideas about democracy and citizenship have been debated and contested since 1990. It investigates the ways in which the public meaning of the major political and sociocultural changes that occurred in Nepal between 1990 and 2013 was constructed, conveyed and consumed. These changes took place against the backdrop of an enormous growth in literacy, the proliferation of print and broadcast media, the emergence of a public discourse on human rights, and the vigorous reassertion of linguistic, ethnic and regional identities. Scholars from a range of different disciplinary locations delve into debates on rumours, ethnicity and identity, activism and gender to provide empirically grounded histories of the nation during one of its most important political transitions.
