Blade-Mounted Trailing Edge Flap Control for Bvi Noise Reduction National Aeronautics and Space Administration (NASA) 2018-07-23 Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. Look Me in the Eye John Elder Robison 2007-09-25 NEW YORK TIMES BESTSELLER • "As sweet and funny and sad and true and heartfelt a memoir as one could find." —from the foreword by Augusten Burroughs Ever since he was young, John Robison longed to connect with other people, but by the time he was a teenager, his odd habits—an inclination to blurt out non sequiturs, avoid eye contact, dismantle radios, and dig five-foot holes (and stick his younger brother, Augusten Burroughs, in them)—had earned him the label "social deviant." It was not until he was forty that he was diagnosed with a form of autism called Asperger's syndrome. That understanding transformed the way he saw himself—and the world. A born storyteller, Robison has written a moving, darkly funny memoir about a life that has taken him from developing exploding guitars for KISS to building a family of his own. It's a strange, sly, indelible account—sometimes alien yet always deeply human.

Super Villain Dad R. Ross 2015-05-22 You're probably wondering why we're trying to be so quiet. Well there's a reason. A really BIG reason. He's standing over there--no--to your right--no, THROUGH the fence. Yes, on the other side of the big, nasty looking security fence that is literally shaking because of electric jolts. Yes, him. He's pretty scary looking, right? He's got to be six five, and he's got the face of a serial murderer. It's all sharp and needing shaved. And that whole skin tight prison body suit thing--it's really not fashionable at all, I admit. What? Why's he got a streak of white in his hair? Well, see, that's why we're here. He's a super villain. So why is an innocent little freshman like me and her annoying twin brother sneaking peeks at him through a prison fence? Well... He's our father. At least, that's what we think.

The Best of the Hack Mechanic Rob Siegel 2021-05-21 In 1986, after owning eleven BMWs in three years, Rob Siegel sent an unsolicited article to Roundel, the magazine of the BMW Car Club of America. Little did he know that it would kick off 35 years of do-it-yourself automotive writing, and that his monthly column The Hack Mechanic? would attract a community of like-minded enthusiasts who, like Rob, try to come up with creative workarounds to keep their cars running without taking them to the dealer every time they hiccup. More than just "use 10mm wrench on bolt B" instructions, though, the columns have always been small journeys into passion and problem solving, philosophy lessons disguised as a repair articles, and short stories about getting into and hopefully out of automotive trouble. The Best Of The Hack Mechanic? is a selection of these pieces, including ones on how to buy a vintage BMW and not get burned, the most creative way possible to lock your keys in a running car, why car folks will do just about anything to avoid buying a family minivan when the money obviously would be so much better spent on "something fun," why a car nut really does need seven cars, why the odds of having a car start is often inversely proportion to the number of cars in the driveway, why finding one of his father's tools is enough to make Rob cry, and why working on your car feels so damned good, all written in Rob's Hack Mechanic voice that hovers somewhere between J.D. Salinger, Bill Bryson, and David Sedaris. Informative, irreverent, and poignant, The Best Of The Hack Mechanic? will have you hoping Rob has another 35 years of columns in him.

A Very Punchable Face Colin Jost 2020-07-14 NEW YORK TIMES BESTSELLER • In these hilarious essays, the Saturday Night Live head writer and Weekend Update co-anchor learns how to take a beating. "I always wanted to punch his face before I read this book. Now I just want to kick him in the balls."—Larry David NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Cosmopolitan • Vulture • Parade If there's one trait that makes someone well suited to comedy, it's being able to take a punch—metaphorically and, occasionally, physically. From growing up in a family of firefighters on Staten Island to commuting three hours a day to high school and "seeing the sights" (like watching a Russian woman throw a stroller off the back of a ferry), to attending Harvard while Facebook was created, Jost shares how he has navigated the world like a slightly smarter Forrest Gump. You'll also discover things about Jost that will surprise and confuse you, like how Jimmy Buffett saved his life, how Czech teenagers attacked him with potato salad, how an insect laid eggs inside his legs, and how he competed in a twenty-five-man match at WrestleMania (and almost won). You'll go behind the scenes at SNL and Weekend Update (where he's written some of the most memorable sketches and jokes of the past fifteen years). And you'll experience the life of a touring stand-up comedian—from performing in rural college cafeterias at noon to opening for Dave Chappelle at Radio City Music Hall. For every accomplishment (hosting the Emmys), there is a setback (hosting the Emmys). And for every

absurd moment (watching paramedics give CPR to a raccoon), there is an honest, emotional one (recounting his mother's experience on the scene of the Twin Towers' collapse on 9/11). Told with a healthy dose of self-deprecation, A Very Punchable Face reveals the brilliant mind behind some of the dumbest sketches on television, and lays bare the heart and humor of a hardworking guy—with a face you can't help but want to punch.

The Volkswagen Beetle Jonathan Wood 2008-03-04 The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce Bodywork & Painting Nelson Education Limited 1979

Cobra Killer Andrew E. Stoner 2015-11-06 In Cobra Killer, authors Andrew E. Stoner and Peter A. Conway tell for the first time in full detail the twisted story of a pair of young, aspiring gay adult film producers whose quest for fame at any cost leads to the gruesome murder of the man who stands in their way, gay porn entrepreneur Bryan Kocis. News of the killing of the forty-four-year-old (stabbed twenty-eight times, his throat slashed to near decapitation) in his suburban home sends shock waves through the bucolic Pennsylvania town. Neighbors were horrified to hear about the murder but equally astonished to learn that Kocis ran a small but thriving online porn operation from his home. The murder investigation leads police and prosecutors to the far reaches of the country, from Virginia to New York City, to Las Vegas, and ultimately to a nude beach in San Diego, where investigators facilitate an incredible clandestine suspect surveillance. The manhunt nets Harlow Cuadra and his lover Joseph Kerekes, both former military men, turned male models, turned hustlers, turned porn producers, who finally land at the bottom of a deadly conspiracy. Cobra Killer takes readers into the sometimes alluring, sometimes dangerous and often surprising world of gay porn and the deceit, schemes, and ultimate betrayals lying underneath the fantasy.

It's not mechanical, and therefore, it's unfamiliar territory. Electrons are invisible, and to an untrained enthusiast they can do unpredictable things. Finally, here is an enthusiast's guide that takes the mysteries and misunderstandings out of automotive electrical design, modification, diagnostics, and repair.

Automotive Wiring and Electrical Systems is the perfect book to unshroud the mysteries of automotive electricals and electronic systems. The basics of electrical principles, including voltage, amperage, resistance, and Ohm's law, are revealed in clear and concise detail so the enthusiast understands what these mean in the construction and repair of automotive electrical circuits. All the tools and the proper equipment required for automotive electrical tasks are covered. In addition, this in-depth guide explains how to perform more complex tasks, such as adding new circuits, installing aftermarket electronics, repairing existing circuits, and troubleshooting. It also explains how to complete popular wiring projects, such as adding late-model electronic accessories and convenience items to earlier-model cars, installing relay systems, designing and assembling multi-function circuits and harnesses, and much more. With this book in hand, you will be able to assemble, design, and build single- and multi-function circuits and harnesses, troubleshoot and repair existing circuits, and install aftermarket systems and electronics. Automotive Wiring and Electrical Systems is the perfect book for wiring a hot rod from scratch, modifying muscle car electrical circuits for cooling fans and/or power windows, or adding a big stereo and other conveniences to modern performance cars.

Hollywood Before Glamour M. Tolini Finamore 2013-01-28 This exploration of fashion in American silent film offers fresh perspectives on the era preceding the studio system, and the evolution of Hollywood's distinctive brand of glamour. By the 1910s, the moving image was an integral part of everyday life and communicated fascinating, but as yet un-investigated, ideas and ideals about fashionable dress.
