The Semantic Web - ISWC 2008 Amit P. Sheth 2008-10-21 The Web is a global information space consisting of linked documents and linked data. As the Web continues to grow and new technologies, modes of interaction, and applications are being developed, the task of the Semantic Web is to unlock the power of information available on the Web into a common semantic information space and to make it available for sharing and processing by automated tools as well as by people. Right now, the publication of large datasets on the Web, the opening of data access interfaces, and the encoding of the semantics of the data extend the current human-centric Web. Now, the Semantic Web community is tackling the challenges of how to create and manage Semantic Web content, how to make Semantic Web applications robust and scalable, and how to organize and integrate information from different sources for novel uses. To foster the exchange of ideas and collaboration, the International Semantic Web Conference brings together researchers and practitioners in relevant disciplines such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, natural language processing, soft computing, and human-computer interaction. This volume contains the main proceedings of ISWC 2008, which we are cited to offer to the growing community of researchers and practitioners of the Semantic Web. We got a tremendous response to our call for research papers from a truly international community of researchers and practitioners from 41 countries submitting 261 papers. Each paper received an average of 3.

The Sub-national Dimension of the EU Carlo Panara 2015-03-02 This book is the first monograph-form legal study on multilevel governance in the EU and represents a radical change in the approach to this topic. Particularly after the Treaty of Lisbon's entry into force, research on multilevel governance can no longer remain confined to the analysis of political dynamics or of soft

law arrangements. Multilevel governance emerges as a constitutional principle in the European constitutional space, envisaging a method of governance based on the strong involvement of sub-national authorities in the creation and implementation of EU law and policy. Its foundation is in the mosaic resulting from the constitutional systems of the Union and its Member States. Multilevel governance arrangements play a fundamental part in achieving key Treaty objectives (such as subsidiarity, respect for the national identities of the Member States including regional and local self-government, openness, and closeness to the citizen). These arrangements lend legitimacy to EU decision-making, while also promoting constitutionalism and democracy in the EU.

Information Security and Privacy Willy Susilo 2012-07-04 This book constitutes the refereed proceedings of the 17th Australasian Conference on Information Security and Privacy, ACISP 2012, held in Wollongong, Australia, in July 2012. The 30 revised full papers presented together with 5 short papers were carefully reviewed and selected from 89 submissions. The papers are organized in topical sections on fundamentals; cryptanalysis; message authentication codes and hash functions; public key cryptography; digital signatures; identity-based and attribute-based cryptography; lattice-based cryptography; lightweight cryptography.

Human Relations Marie Dalton 2010-01-19 This contemporary text will connect you with current human relations issues and the challenges your students will encounter in the twenty-first century. Human Relations, 4e prepares students to confidently put theory into action to get the results they want. Authors Dalton, Hoyle, and Watts use a unique approach that offers students the opportunity to experience and analyze firsthand the contemporary issues of human relations. By weaving their varied professional backgrounds and knowledge into every chapter, they provide the insight and awareness that comes only from real-life experience. With its improved design and focus on new, contemporary topics, HUMAN RELATIONS 4e once again delivers a dynamic and real-world perspective to the study of human relations. The Supplement Handbook Mark Moyad 2014-11-04 Nearly half of Americans use supplements--and many more are curious about them--yet questions abound. Will feverfew help my migraines? Are there any vitamins that will keep my skin clear? Does lysine really prevent cold sores? Are there herbs I can take to boost my mood? Are any of these things safe? Mark Moyad, MD, MPH is the only physician in the United States who has an endowed position to study vitamins, minerals, herbs, and other supplements. For the past 25 years, he's been researching supplements, using them in his practice, and traveling the country giving lectures to laypeople and physicians about what works and what's worthless in the world of drugs and supplements. Based on the latest research as well as Dr. Moyad's clinical experience, The Supplement Handbook will guide you through the proven (or debunked) treatment options for more than 100 common conditions--everything from arthritis, heartburn, and high cholesterol to fibromyalgia, migraines, and psoriasis. Dr. Moyad provides clear guidelines, sifting through conflicting information for a definitive answer you can use today. He does not hesitate to point out which remedies are overhyped, useless, and even harmful. He even ranks the most effective options so you know which remedies to try first, and he's honest about when over-the-counter or prescription drugs are the better option. More than an overview, The Supplement Handbook delivers prescriptive, reliable advice. Whether you're an alternative medicine convert or an interested-but-confused supplement novice, this comprehensive, evidence-based guide is sure to become a must-have reference in your home.

2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security and Communication Engineering to share the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. They take this chance to get together, sharing their latest research achievements with each other. It has also achieved great success by its unique characteristics and strong academic atmosphere as well as its authority.

Multi-Agent Systems and Applications IV Michal Pechoucek 2005-10-03 The aim of the CEEMAS conference series is to provide a biennial forum for the presentation of multi-agent research and development results. With its particular geographical orientation towards Central and Eastern Europe, CEEMAS has become an internationally recognised event with participants from all over the world. After the successful CEEMAS conferences in St. Petersburg (1999), Cracow (2001) and Prague (2003), the 2005 CEEMAS conference takes place in Budapest. The programme committee of the conference series consists of established researchers from the region and renowned international colleagues, sharing the prominent rank of CEEMAS among the leading events in multi-agent systems. In the very competitive field of agent oriented conferences and workshops nowadays (such as AAMAS, WI/IAT, EUMAS, CIA, MATES) the special profile of CEEMAS is that it is trying to bridge the gap between applied research achievements and theoretical research activities. Our ambition is to provide a forum for presenting theoretical research with an evident application potential, implemented application prototypes and their properties, as well as industrial case studies of successful (but also unsuccessful) agent technology deployments. This is why the CEEMAS proceedings volume provides a collection of research and application papers. The technical research paper section of the proceedings (see pages 11–499) contains pure research papers as well as research results in application settings while the application papers section (see pages 500–530) contains papers focused on application aspects. The goal is to demonstrate the real life value and commercial reality of multi-agent systems as well as to foster communication between academia and industry in this field.

Breaking the Boundaries B. Sanyal 2013-03-09 Exploring the complex arena of international planning for development has until now been uniquely the privilege of influential senior western planners. This book calls into question many of their hallowed principles and much of the conventional wisdom still evident in the halls of academe. At a time of increasing enrollment of foreign students in North American planning programs, the emergence of a new voice has coincided with a growing skepticism, worldwide, about old notions of planning and development in poorer and ex-colonial countries. Now there is a need for brave innovations to reshape our understanding of the global crisis and the potential for progressive and democratic local solutions in both rich and poor nations alike. This new voice is given expression by academics and professionals from Third World nations who received their planning education in the west and who now hold posts in major western planning schools. Breaking the Boundaries presents their views, and those of concerned colleagues, about the need for a radically changed curriculum based on a comparative, one-world approach to planning education. Their personal experiences as young

expatriate scholars, and later as teachers of both Third World and First World students in western planning schools are seen as crucial to this need for change. Through candid reflections and perceptive critiques of their own field- the spatial, environmental, social, design and communications disciplines - the contributors explore crucial issues in development planning from theoretical and professional practice perspectives.

Optical Fiber Telecommunications VB Ivan Kaminow 2010-07-28 Optical Fiber

Telecommunications V (A&B) is the fifth in a series that has chronicled the progress in the research and development of lightwave communications since the early 1970s. Written by active authorities from academia and industry, this edition not only brings a fresh look to many essential topics but also focuses on network management and services. Using high bandwidth in a cost-effective manner for the development of customer applications is a central theme. This book is ideal for R&D engineers and managers, optical systems implementers, university researchers and students, network operators, and the investment community. Volume (A) is devoted to components and subsystems, including: semiconductor lasers, modulators, photodetectors, integrated photonic circuits, photonic crystals, specialty fibers, polarization-mode dispersion, electronic signal processing, MEMS, nonlinear optical signal processing, and quantum information technologies. Volume (B) is devoted to systems and networks, including: advanced modulation formats, coherent systems, time-multiplexed systems, performance monitoring, reconfigurable add-drop multiplexers, Ethernet technologies, broadband access and services, metro networks, long-haul transmission, optical switching, microwave photonics, computer interconnections, and simulation tools. Biographical Sketches Ivan Kaminow retired from Bell Labs in 1996 after a 42-year career. He conducted seminal studies on electrooptic modulators and materials, Raman scattering in ferroelectrics, integrated optics, semiconductor lasers (DBR, ridge-waveguide InGaAsP and multi-frequency), birefringent optical fibers, and WDM networks. Later, he led research on WDM components (EDFAs, AWGs and fiber Fabry-Perot Filters), and on WDM local and wide area networks. He is a member of the National Academy of Engineering and a recipient of the IEEE/OSA John Tyndall, OSA Charles Townes and IEEE/LEOS Quantum Electronics Awards. Since 2004, he has been Adjunct Professor of Electrical Engineering at the University of California, Berkeley. Tingye Li retired from AT&T in 1998 after a 41-year career at Bell Labs and AT&T Labs. His seminal work on laser resonator modes is considered a classic. Since the late 1960s, He and his groups have conducted pioneering studies on lightwave technologies and systems. He led the work on amplified WDM transmission systems and championed their deployment for upgrading network capacity. He is a member of the National Academy of Engineering and a foreign member of the Chinese Academy of Engineering. He is a recipient of the IEEE David Sarnoff Award, IEEE/OSA John Tyndall Award, OSA Ives Medal/Quinn Endowment, AT&T Science and Technology Medal, and IEEE Photonics Award. Alan Willner has worked at AT&T Bell Labs and Bellcore, and he is Professor of Electrical Engineering at the University of Southern California. He received the NSF Presidential Faculty Fellows Award from the White House, Packard Foundation Fellowship, NSF National Young Investigator Award, Fulbright Foundation Senior Scholar, IEEE LEOS Distinguished Lecturer, and USC University-Wide Award for Excellence in Teaching. He is a Fellow of IEEE and OSA, and he has been President of the IEEE LEOS, Editor-in-Chief of the IEEE/OSA J. of Lightwave Technology, Editor-in-Chief of Optics Letters, Co-Chair of the OSA Science & Engineering Council, and General Co-

Chair of the Conference on Lasers and Electro-Optics.

The Chronicles of Kerrigan Prequel Books #1-3 W.J. May 2017-02-21 A Boxset collection of the first 3 books in the Chronicles of Kerrigan Prequel Series! Christmas Before the Magic - Book #1 Learn how it all began ... before the magic of tatùs. When Argyle invites his best friend, Simon Kerrigan, home for the Christmas holidays, he wants to save Simon from staying at Guilder Boarding School on his own. Simon comes along and doesn't expect to find much more excitement in the tiny Scottish town where Argyle's family lives. Until he meets Beth, Argyle's older sister. She's beautiful, brash and clearly interested in him. When her father warns him to stay away from her, Simon tries, but sometimes destiny has a hope of it's own. Question the Darkness – Book #2 Learn how it all began ... before Rae Kerrigan. The sins of the father are the sins of the son. What did Rae's father do that put fear in people's eyes at the name Kerrigan? Simon Kerrigan is a bright kid. He likes to ask questions and push adults in their way of thinking. He's falling for a girl he's been warned to stay away from. Tempted by forbidden love, he also must face the biggest challenge of his life: receive a tattoo on his sixteenth birthday. This ink is going to give him a supernatural ability unlike anyone before him. When secrets of the past begin to reveal themselves, he questions everything he's ever known. Pressure from Guilder Boarding School and the Privy Council only confuse Simon more as he struggles to find himself. How hard will he have to shake the family tree to find the truth about the past? The Chronicles of Kerrigan Prequel is the beginning of the story before Rae Kerrigan. Christmas Before the Magic is just the beginning (but not the end...) Into the Darkness – Book #3 What did Rae's father do that put fear in people's eyes at the name Kerrigan? After a mysterious attempt is made on his life, Simon Kerrigan has more questions than ever, and this time, he's not the only one. The beginnings of a secret society are formed at Guilder. A society of other like-minded students all unsatisfied with the status quo. All searching for the truth. But things aren't always as they seem. When Simon gets an unexpected visitor, his entire world is turned upside-down. Suddenly, the rules that were made to keep him safe, are the only things standing in his way. Who can he trust? Can he learn to master his tatù? Most importantly, can he do it in time to protect those things that are most precious to him?

That Crumpled Paper Was Due Last Week Ana Homayoun 2010-01-05 At last, the solution for getting disorganized boys back on track. Missed assignments. Lack of focus and enthusiasm. Falling grades. For too many boys and their frustrated parents, these are the facts of life. But they don't have to be. Top academic counselor Ana Homayoun has helped turn even the most disorganized, scattered, and unfocused boys into successful young people who consistently meet their personal and academic challenges. She does this by getting back to basics- -starting with a simple fact: Most boys need to be taught how to get organized, how to study, and-- most important--how to visualize, embrace and meet their own goals. With an accessible and no-nonsense approach, Homayoun shows how to: ?Identify their son's disorganizational style ?Help him set academic and personal goals he cares about ?Design and establish the right "tools of the trade" ?Complete assignments without pulling all-nighters ?Help him tune out social pressure and fend off anxiety Much more than a study guide, this insightful, user-friendly book provides a roadmap for the success too many boys have trouble finding--in school and in life.

The Girl in the Mirror Sheila Brooks 2014-10-27 Sheila did not have what many would consider an easy childhood, but through the love and care of her darling Granny Brooks, she learned perseverance and to have faith at a young age. In The Girl in the Mirror, Sheila invites you into her life journey from childhood to adulthood. She shares her experiences—good, bad, and somewhere in between—and how she thought of those occasions at the time, as a child, teenager, and adult.

She also shares how she was able to change her perceptions of the bad experiences to help her to be a better person. Through it all, she remains adamant about not allowing unpleasant experiences to prevent her from being whole, healthy, and successful. Ultimately designed to prompt readers to look deeper into their own lives and experiences and look at them in a positive light, *The Girl in the Mirror* was created to inform, educate, and inspire all to become more conscious and to take a deeper look into their lives and the world they live in. Through Sheila's journeys, readers can draw insight and inspiration on how to take control of their lives and be the great people they were created to be. No matter what your challenges, the greatest victory is to rise above and claim your most satisfying life!
