Changing Environments Susan Bermingham 2000 Designed to help students make the step up from GCSE to A-level study, this text aims to provide a full range of lively and interesting resources. Case studies help to reinforce and illustrate geographical concepts and exam practice has been included. Studies in the Roman and Medieval Archaeology of Exeter Stephen Rippon 2021 This second volume presenting the research carried out through the Exeter: A Place in Time project presents a series of specialist contributions that underpin the general overview published in the first volume. Chapter 2 provides summaries of the excavations carried out within the city of Exeter between 1812 and 2019, while Chapter 3 draws together the evidence for the plan of the legionary fortress and the streets and buildings of the Roman town. Chapter 4 presents the medieval documentary evidence relating to the excavations at three sites in central Exeter (High Street, Trichay Street and Goldsmith Street), with the excavation reports being in Chapter 5-7. Chapter 8 reports on the excavations and documentary research at Rack Street in the south-east quarter of the city. There follows a series of papers covering recent research into the archaeometallurgical debris, dendrochronology, Roman pottery, Roman ceramic building material, Roman querns and millstones, Claudian coins, an overview of the Roman coins from Exeter and Devon, medieval pottery, and the human remains found in a series of medieval cemeteries.

Late Roman Dorset Black-Burnished Ware (BB1) Malcolm Lyne 2022-03-10 Much has been written about Roman Dorset Black-Burnished Ware (BB1) and its Late Iron Age Durotrigian origins since the industry was first recognised at the end of the 1960s. However, this has mostly focused on the forms produced and distributed during the 1st to 3rd centuries. This publication covers those of the late 3rd to early 5th century.

The Work of Giants Andrew F. Pearson 2006 Roman society demanded stone on a massive and unprecedented scale but, while its buildings often survive to impress the world, ancient quarrying is a forgotten industry. Drawing on the latest archaeological evidence, Andrew Pearson examines the diverse practices of procuring stone, and explains how the products of quarrying were transported and employed within Roman buildings. As well as the major industries such as Purbeck and Bath, attention is paid to the smaller enterprises -- and to foreign quarries and their products. Based largely on the author's own research, this is a long-overdue study -- without competition. It will be important reading for students of the Roman economy.

The Poole Iron Age Logboat Jessica Berry 2019-05-02 This book is the culmination of significant multi-disciplinary work carried out by a variety of specialists, from conservators to woodworking and boatbuilding experts, exploring the history of the Poole Iron Age logboat (today imposingly displayed in the entrance to Poole Museum in Dorset) and also its functionality – or lack of – as a vessel.

The Green Index Marian Board 1990 This directory provides those interested in green issues with a comprehensive list of environmental organizations and contacts in Britain and Ireland. It includes some 5,200 entries for national, regional and local organizations, institutions, groups and companies. Entry details cover name, address, telephone, type of organization, aims and publications. Annotation copyrighted by Book News, Inc., Portland, OR

The History of Geoconservation Cynthia V. Burek 2008 This book is the first to describe the history of geoconservation. It draws on experience from the UK, Europe and further afield, to explore topics including: what is geoconservation; where, when and how did it start; who was responsible; and how has it differed across the world? Geological and geomorphological features, processes, sites and specimens, provide a resource of immense scientific and educational importance. They also form the foundation for the varied and spectacular landscapes that help define national and local identity as well as many

of the great tourism destinations. Mankind's activities, including contributing to enhanced climate change, pose many threats to this resource: the importance of safeguarding and managing it for future generations is now widely accepted as part of sustainable development. Geoconservation is an established and growing activity across the world, with more participants and a greater profile than ever before. This volume highlights a history of challenges, set-backs, successes and visionary individuals and provides a sound basis for taking geoconservation into the future.
