"All the Real Indians Died Off" Roxanne Dunbar-Ortiz 2016-10-04 Unpacks the twenty-one most common myths and misconceptions about Native Americans In this enlightening book, scholars and activists Roxanne Dunbar-Ortiz and Dina Gilio-Whitaker tackle a wide range of myths about Native American culture and history that have misinformed generations. Tracing how these ideas evolved, and drawing from history, the authors disrupt long-held and enduring myths such as: "Columbus Discovered America" "Thanksgiving Proves the Indians Welcomed Pilgrims" "Indians Were Savage and Warlike" "Europeans Brought Civilization to Backward Indians" "The United States Did Not Have a Policy of Genocide" "Sports Mascots Honor Native Americans" "Most Indians Are on Government Welfare" "Indian Casinos Make Them All Rich" "Indians Are Naturally Predisposed to Alcohol" Each chapter deftly shows how these myths are rooted in the fears and prejudice of European settlers and in the larger political agendas of a settler state aimed at acquiring Indigenous land and tied to narratives of erasure and disappearance. Accessibly written and revelatory, "All the Real Indians Died Off" challenges readers to rethink what they have been taught about Native Americans and history.

Galileo Goes to Jail and Other Myths about Science and Religion Ronald L. Numbers 2010-11-08 If we want nonscientists and opinion-makers in the press, the lab, and the pulpit to take a fresh look at the relationship between science and religion, Ronald L. Numbers suggests that we must first dispense with the hoary myths that have masqueraded too long as historical truths. Until about the 1970s, the dominant narrative in the history of science had long been that of science triumphant, and science at war with religion. But a new generation of historians both of science and of the church began to examine episodes in the history of science and religion through the values and knowledge of the actors themselves. Now Ronald Numbers has recruited the leading scholars in this new history of science to puncture the myths, from Galileo's incarceration to Darwin's deathbed conversion to Einstein's belief in a personal God who "didn't play dice with the universe." The picture of science and religion at each other's throats persists in mainstream media and scholarly journals, but each chapter in Galileo Goes to Jail shows how much we have to gain by seeing beyond the myths.

The Myth of the Twentieth Century Alfred Rosenberg 2018-01-29 Regarded as the second most important book to come out of Nazi Germany, Alfred Rosenberg's *Der Mythus des zwanzigsten Jahrhunderts* is a philosophical and political map which outlines the ideological background to the Nazi Party and maps out how that party viewed society, other races, social ordering, religion, art, aesthetics and the structure of the state. The "Mythus" to which Rosenberg (who was also editor of the Nazi Party newspaper) refers was the concept of blood, which, according to the preface, "unchains the racial world-revolution."

Rosenberg's no-holds-barred depiction of the history of Christianity earned it the accusation that it was anti-Christian, and that unjustified controversy overshadowed the most interesting sections of the book which deal with the world racial situation and the demand for racially homogenous states as the only method to preserve individual world cultures. Rosenberg was hanged at Nuremberg on charges of "waging wars of aggression" even though he had never served in the military, and it is likely that he was hanged purely because of this book. The Almost Nearly Perfect People Michael Booth 2014-02-06 The Danes are the happiest people in the world, and pay the highest taxes. 'Neutral' Sweden is one of the biggest arms manufacturers in the world. Finns have the largest per capita gun ownership after the US and Yemen. 54 per cent of Icelanders believe in elves. Norway is the richest country on earth. 5 per cent of Danish men have had sex with an animal. He leaves his adopted home of Denmark and embarks on a journey through all five of the Nordic countries to discover who these curious tribes are, the secrets of their success and, most intriguing of all, what they think of each other. Along the way a more nuanced, often darker picture emerges of a region plagued by taboos, characterised by suffocating parochialism and populated by extremists of various shades.
