Reframing Sustainable Tourism Stephen F. McCool 2015-08-19 This book examines the need for a new way of describing sustainable tourism and also looks at the frameworks needed to rethink how to apply this to communities, private operators and protected area managers. It makes it clear that tourism is just one of many human activities that affects host communities. The work includes informative and provocative case studies with realistic applications. References included in the book will help graduate students formulate new hypotheses and suggest literature for them. Tools and techniques useful to tourism practitioners suggest innovative approaches to marketing, management and community development.

Communicating Protected Areas Wendy Goldstein 2004 Protected areas operate within complex ecological and social systems, presenting challenges that cannot be resolved by technical solution alone. Achieving the management objectives of protected areas requires a social approach in which strategic communication is a key instrument. This publication explores the often underestimated potential of communication, sharing valuable experiences from protected areas across the world, drawing on papers presented at the Vth IUCN World Parks Congress, 2003 and others.

The Oxford Guide to the Transeurasian Languages Martine Robbeets 2020-05-27 The Oxford Guide to the Transeurasian Languages provides a comprehensive account of the Transeurasian languages, and is the first major reference work in the field since 1965. The term 'Transeurasian' refers to a

large group of geographically adjacent languages that includes five uncontroversial linguistic families: Japonic, Koreanic, Tungusic, Mongolic, and Turkic. The historical connection between these languages, however, constitutes one of the most debated issues in historical comparative linguistics. In the present book, a team of leading international scholars in the field take a balanced approach to this controversy, integrating different theoretical frameworks, combining both functional and formal linguistics, and showing that genealogical and areal approaches are in fact compatible with one another. The volume is divided into five parts. Part I deals with the historical sources and periodization of the Transeurasian languages and their classification and typology. In Part II, chapters provide individual structural overviews of the Transeurasian languages and the linguistic subgroups that they belong to, while Part III explores Transeurasian phonology, morphology, syntax, lexis, and semantics from a comparative perspective. Part IV offers a range of areal and genealogical explanations for the correlations observed in the preceding parts. Finally, Part V combines archaeological, genetic, and anthropological perspectives on the identity of speakers of Transeurasian languages. The Oxford Guide to the Transeurasian Languages will be an indispensable resource for specialists in Japonic, Koreanic, Tungusic, Mongolic, and Turkic languages and for anyone with an interest in Transeurasian and comparative linguistics more broadly.

Divisions of a Naturalist (Classic Reprint) Sir Edwin Ray Lankester 2018-03-23 Excerpt from Divisions of a Naturalist Daily Telegraph. Under that title I have already published two volumes of similar selections. I have chosen a new title, Divisions of a Naturalist, for this third volume in order to avoid confusion with the earlier ones. Illustrative drawings have been introduced into several of the articles and a few alterations made in the text. But they remain essentially what their origin implies namely, detached essays addressed to a wide public. Then and Now Robert Vaughn 2014-12-08 It may not be out of place to explain how this book came to find its way into print. It was written for my little daughter, in the form of letters at various times, and not intended for publication, but many friends after reading them insisted that they should be published. One said: "You must not wait until you are dead before these letters are given to the world." As my desire is, by the grace of God, to live many years yet, I now present these letters to the reader, supplemented by others from old time friends who braved the perils and dangers of pioneer life; and as they are intended to be a part of the history of this great state, care has been taken to keep strictly to the truth. It is hoped that a line here and there will be appreciated by those who ride in palace cars as well as the old pioneers who came west in prairie schooners.

Journal of a Trapper Osborne Russell 2019-10 In 1834, Osborne Russell joined an expedition from Boston, under the direction of Nathaniel J. Wyeth, which proceeded to the Rocky Mountains to capitalize on the salmon and fur trade. He would remain there, hunting, trapping, and living off the land, for the next nine

years. Journal of a Trapper is his remarkable account of that time as he developed into a seasoned veteran of the mountains and experienced trapper. Overtourism Claudio Milano 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

Urban Design Reader Steve Tiesdell 2007-02-07 Essential reading for students and practitioners of urban design, this collection of essays introduces the 6 dimensions of urban design through a range of the most important classic and contemporary key texts. Urban design as a form of place making has become an increasingly significant area of academic endeavour, of public policy and professional practice. Compiled by the authors of the best selling Public Places Urban Spaces, this indispensable guide includes all the crucial definitions and various understandings of the subject, as well as a practical look at how to implement urban design that readers will need to refer to time and time again. Uniquely, the selections of essays that include the works of Gehl, Jacobs, and Cullen, are presented substantially in their original form, and the truly accessible dip-in-and-out format will enable readers to form a deeper, practical understanding of urban design.

Using Science to Improve the BLM Wild Horse and Burro Program National Research Council 2013-09-04 Using Science to Improve the BLM Wild Horse and Burro Program: A Way Forward reviews the science that underpins the Bureau of Land Management's oversight of free-ranging horses and burros on federal public lands in the western United States, concluding that constructive changes could be implemented. The Wild Horse and Burro Program has not used scientifically rigorous methods to estimate the population sizes of horses and burros, to model the effects of management actions on the animals, or to assess the availability and use of forage on rangelands. Evidence suggests that horse populations are growing by 15 to 20 percent each year, a level that is unsustainable for maintaining healthy horse populations as well as healthy ecosystems. Promising fertility-control methods are available to help limit this population growth, however. In addition, science-based methods exist for improving population estimates, predicting the effects of management practices in order to maintain genetically diverse, healthy populations, and estimating the productivity of rangelands. Greater transparency in how science-based methods are used to inform management decisions may help increase public confidence in the Wild Horse and Burro Program.

Famous Frontiersmen and Heroes of the Border Charles Haven Ladd Johnston 2021-05-10 Famous Frontiersmen and Heroes of the Border is a collection of biographies of valiant and daring adventurers, who were among the early settlers of the Wild West. These men were real scouts and trappers, for they lived in the wilds and had to know how to shoot a rifle; how to trap; and how to camp in whatever place night happened to overtake them. Biographies presented in this book are accurate histories of several important frontiersmen and heroes of the border. These stories are all true and are vouched for by early historians. _x000D_ Contents: _x000D_ Daniel Morgan: The Famous Virginian Rifleman, and His Adventures with the Indian Bear _x000D_ James Harrod: Founder of Harrodsburg, Kentucky, and Famous Scout of the Frontier _x000D_ Robert McLellan: Pluckiest of the Early Pioneers _x000D_ Colonel Benjamin Logan: The Intrepid Fighter of the Kentucky Frontier _x000D_ George Rogers Clarke: Famous Leader of the Borderland of Kentucky _x000D_ John Slover: Scout under Crawford and Hero of Extraordinary Adventures _x000D_ Lewis Wetzel: Heroic Virginia Frontiersman and Implacable Enemy of the Redskins _x000D_ Samuel Colter: And His Wonderful Race for Life _x000D_ Meshack Browning: The Celebrated Bear Hunter of the Alleghanies _x000D_ "Bill" Bent: Hero of the Old Santa Fé Trail _x000D_ Thomas Eddie: The Last of the Old School Trappers _x000D_ Jim Bridger: Founder of Bridger, Wyoming, and Famous Indian Fighter _x000D_ "Old Bill" Williams: The Famous Log Rider of Colorado _x000D_ "Big Foot" Wallace: Noted Ranger on the Texan Frontier _x000D_ Captain

Guidelines for Protected Areas Legislation Barbara J. Lausche 2011 The central aim of this publication is to consider the key elements of a modern, comprehensive, and effective legal framework for successful management of protected areas. They provide practical guidance for all those involved in developing, improving, or reviewing national legislation on protected areas, be they legal drafters and practitioners, protected area managers, interested NGOs, or scholars. These guidelines include fifteen case studies, eight dealing with the protected area legislation of individual countries and six cases dealing with specific sites providing fundamental solutions that stand the test of time.

Tourism in National Parks and Protected Areas Paul F. J. Eagles 2002 This book describes the state of the art of tourism planning and management in national parks and protected areas. It also provides guidelines for best practice in tourism operations. Other objectives are to: Describe case studies and guidelines that contribute to conservation of biological diversity; consider the role of local communities within or near these areas; outline the development of tourism infrastructure and services; discuss visitor management; provide guidelines to enhance the quality of the tourism experience. The focus is global and the book will appeal to both academics and practitioners.

Writing and Presenting Research Angela Thody 2006-06-15 This accessible and wide-ranging book is an invaluable introductory guide through the choices to be made when deciding how to report research. Writing and Presenting Research covers research written as theses and dissertations; chapters, books, reports and articles in academic, professional or general media such as newspapers; and also reviews the options for presenting research orally as lectures, keynotes, conference papers and even TV game shows. These forms of reporting research have well-established conventions for their formats, but they also have growing numbers of alternative possibilities. This has generated debate about what is, or is not, acceptable, and the aim of this book is to make this debate more manageable for those wanting to assess which of the conventional or alternative possibilities on offer is most appropriate for reporting their current research. Arranged in easily followed sections enlivened with checklists, style variations, examples and reflection points, Writing and Presenting

Independent Power Projects in Sub-Saharan Africa Anton Eberhard 2016-04-18 Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in Sub-Saharan Africa. Simply put, Africa does not have enough power. Despite the abundant low-carbon and low-cost energy resources available to Sub-Saharan Africa, the region's entire installed electricity capacity, at a little over 80 GW, is equivalent to that of the Republic of Korea. Looking ahead, Sub-Saharan Africa will need to ramp-up its power generation capacity substantially. The investment needed to meet this goal largely exceeds African countries already stretched public finances. Increasing private investment is critical to help expand and improve electricity supply. Historically, most private sector finance has been channeled through privately financed independent power projects (IPP), supported by nonrecourse or limited recourse loans, with long-term power purchase agreements with the state utility or another off-taker. Between 1990 and 2014, IPPs have spread across Sub-Saharan Africa and are now present in 17 countries. Currently, there are 125 IPPs, with an overall installed capacity of 10.7 GW and investments of \$24.6 billion. However, private investment could be much greater and less concentrated. South Africa alone accounts for 67 IPPs, 4.3 GW of capacity and \$14.4 billion of investments; the remaining projects are concentrated in a handful of countries. The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment. At the core of this analysis is a reflection on whether IPPs have in fact benefited Sub-Saharan Africa, and how they might be improved. The analysis is based primarily on in depth case studies, carried out in five countries, including Kenya, Nigeria, South Africa, Tanzania and Uganda, which not only have the most numerous but also among the most extensive experience with IPPs.

Wisdom in the Open Air Peter Reed 1993 "Wisdom in the Open Air" traces the Norwegian roots of the strain of thinking called "deep ecology" - the search for the solutions to environmental problems by examining the fundamental tenets of our culture. Although Arne Naess coined the term in the 1970s, the insights of deep ecology actually reflect a whole tradition of thought that can be seen in the history of Norwegian culture, from ancient mountain myths to the radical ecoactivism of today. Beginning with an introduction to Norway's emphasis on nature and the wild, Reed and Rothenberg explore the birth of the environmental movement in the 1960s and 1970s. What follows is a collection of writings by prominent Norwegian thinkers on humanity and nature, most never before published in English. From Peter Wessel Zapffe, a twentieth-century Kierkegaardian figure, the list goes on to include Arne Naess, activist/critic/artist Sigmund Kvaloy, wilderness educator Nils Faarlund, novelist Finn Alnaes, sociologist Johan Galtung, and social reformer Erik Dammann. Their points of view offer thoughts on the significance of modern life and what it means to be human in the face of deteriorating environmental global trends of the 20th century. "Wisdom in the Open Air" asks and answers a fundamental question concerning the ecomovement: what is the role of deep, often abstract, thinking in the attempt to avert a very real ecological crisis?

Autobiography of a Yogi Paramahansa Yogananda 2009-01-01 The autobiography of Paramahansa Yogananda (1893 - 1952) details his search for a guru, during which he encountered many spiritual leaders and world-renowned scientists. When it was published in 1946 it was the first introduction of many

westerners to yoga and meditation. The famous opera singer Amelita Galli-Curci said about the book: "Amazing, true stories of saints and masters of India, blended with priceless superphysical information-much needed to balance the Western material efficiency with Eastern spiritual efficiency-come from the vigorous pen of Paramhansa Yogananda, whose teachings my husband and myself have had the pleasure of studying for twenty years."

Slow Violence and the Environmentalism of the Poor Rob Nixon 2011 "Slow violence" from climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Rob Nixon focuses on the inattention we have paid to the lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today.

Transboundary Conservation Patricio Robles Gil 2005-01 Conservation International has been instrumental in raising awareness and concern about the most environmentally endangered regions and animals throughout the world with its publication of high-quality volumes that combine breathtaking photography with expert scientific analysis. Continuing in this distinguished tradition, Conservation International offers here a new, lushly illustrated volume that examines transboundary conservation areas—environmentally endangered regions that sprawl across international borders and contain multiple protected areas. Recent studies estimate that there are now 188 transboundary conservation areas in 112 countries, making up about 17 percent of the designated protected areas around the world. This book specifically examines 28 of these areas, found across all continents, from Asia to Antarctica, and in several oceans. Eminent scientists and conservationists contribute detailed histories of the areas, from the birth of the initial conservation efforts to the latest research that reveals new regions and assesses the success of the programs to protect existing ones. Accompanying the analyses are Conservation International's trademark vibrant full-color photographs that powerfully document these rapidly disappearing treasures. Following in the footsteps of *Hotspots*, *Wilderness*, *Wildlife Spectacles*, and *Hotspots Revisited*, *Transboundary Conservation* is an essential resource for all those concerned about the future of our environment.

Social Studies for Secondary Schools Alan J. Singer 2014-10-08 Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: "Think it over," "Add your voice to the discussion," "Try it yourself," and "It's your classroom." All of these are supported with online teaching material. Designed for

undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text

My Life and Times Jerome K. Jerome 2015-04-23 This early work by Jerome K. Jerome was originally published in 1926 and we are now republishing it with a brand new introductory biography. 'My Life and Times' is the autobiography of this humorous author of fiction and essays. Jerome Klapka Jerome was born in Walsall, England in 1859. Both his parents died while he was in his early teens, and he was forced to quit school to support himself. In 1889, Jerome published his most successful and best-remembered work, 'Three Men in a Boat'. Featuring himself and two of his friends encountering humorous situations while floating down the Thames in a small boat, the book was an instant success, and has never been out of print. In fact, its popularity was such that the number of registered Thames boats went up fifty percent in the year following its publication.
